 well! Keep your eyes peeled**

SPECIES/ DESCRIPTION (Stocking Rate: http://bit.ly/WCoSWCD-FishInfo) Fish come from Hermann Brothers Fish Farm	SIZE	PRICE	QTY	COST
Largemouth Bass - Popular game fish; a predator that helps control bluegill and crappie populations. Can grow up to 1/2 to 3/4 pound per year. Do not mix with smallmouth bass.	3"	\$75(bag of 50)		
	5-8"	\$181 (bag of 50)		
Channel Catfish - Excellent for food and sport fishing. Can grow up to 1 pound per year. Compatible with all species and work especially well with Hybrid Sunfish & Largemouth Bass. May need to restock periodically.	6-8"	\$67.50 (INCREMENTS OF 50)		
Fathead Minnows - Stock in new ponds prior to Largemouth Bass so they are able to spawn and provide food for young Bass.	1-3"	\$10 PER POUND		
Hybrid Sunfish (or Hybrid Bluegill) - Fast growing, excellent small pond fish that will not overpopulate. Produced by crossing a male Bluegill with a female Green Sunfish. This hybrid cross produces 90% males/10% female. They can reproduce with Bluegills if they are present in the pond. Can grow up to 1/4 to 1/2 pound per year.	1-2"	\$97 (bag of 250)		
	3-5"	\$63 (bag of 50)		
Standard Bluegill - An excellent, prolific sport fish that should be stocked with Largemouth Bass. Similar to but grows a little slower than the Hybrid Sunfish. Grows up to 1/2 pound per year.	1-2"	\$97 (bag of 250)		
	3-5"	\$63 (bag of 50)		
Standard Redear - Rapid growth rate, low reproductive rate, excellent addition to a Bass-Bluegill combination. Recommended for deeper ponds feeding on snails/clams, and are usually harder to catch except during spawning season when they are in the shallows. Can grow up to 1/3 pound per year.	1-2"	\$101 (bag of 250)		
Black Crappie	2-4"	\$98 (Bag of 100)		
Triploid Grass Carp - Will not reproduce. They eat root aquatic vegetation, but not algae, most aggressively in the hot, summer months, and good results are usually seen after the second season. They will eat up to 2-3 times their weight each day. They should be stocked at 3-5 per surface acre (pond length x width divide by 43,560 feet per acre). Restocking will need to take place every 3-5 years. Ponds must have an area that is 7-10' deep for fish to overwinter. ** Must fill out info below for required IDNR permit, for Grass Carp. Any forms for grass carp w/out information will be sent back.	10-14"	\$12.50 ea		

ORDER TOTAL:
